Hema Praharsha Kanithi

hemaprahrsha.k@ | +1 (937) 603 6864 | hema-praharsha-kanithi/

PROFILE:

AWS Certified Solutions Architect and aspiring Cloud Engineer with 5 years of professional experience in designing scalable cloud solutions, automating CI/CD pipelines and managing secure AWS environments. Skilled in Terraform, Lambda, and serverless architectures and AI concepts and methodology. Currently pursuing master's in computer science, majoring in AI and ML. Passionate about leveraging artificial intelligence (AI) and machine learning (ML) skills to design innovative and scalable cloud solutions. Eager to contribute to dynamic teams by integrating cutting-edge cloud technologies with AI/ML capabilities to drive business efficiency and innovation while continuing to grow as a cloud professional.

EMPLOYMENT HISTORY:

- **CVS Health**
  Senior DevOps Engineer | Pheonix, Arizona | Jan 2025 – Present
  - Automated cloud infrastructure with Terraform, Jenkins, and GitLab CI/CD across AWS (EC2, VPC, IAM, ALB, Route 53, Autoscaling) and Azure (VMs, VNets, AD).
  - Containerized and orchestrated applications using Docker, Kubernetes (EKS, OpenShift), and Helm, with monitoring via Prometheus, Grafana, and Splunk.
  - Developed Bash, Python, and PowerShell scripts for deployments, log analysis, and security automation; integrated HashiCorp Vault and Terraform Sentinel for compliance.
  - Supported CI/CD pipelines, production releases, and cross-team deployments using JIRA, Azure DevOps, and Confluence, ensuring high availability with minimal downtime.

- **Accenture Pvt. Ltd.**
  AWS Senior Application Developer | Hyderabad, India | Oct 2022- Jan 2024
  - Managed Azure DevOps tasks, production deployments, and regression testing with post-GoLive hypercare support.
  - Built and maintained AWS environments using Terraform, leveraging AWS Lambda, Datasync, and Transfer Family for data migration and cost-optimized serverless workflows.
  - Designed scalable data pipelines with MWAA, integrated monitoring dashboards with CloudWatch, and managed AWS databases including DynamoDB, RDS, and PostgreSQL via pgAdmin.

- **Amazon India Pvt. Ltd**.
  AWS Application Developer | Hyderabad, India | Sept 2021 - May 2022
  - Built and deployed applications on RHEL using Jenkins, Maven, and Git, with automation via Chef and shell scripts.
  - Provisioned and managed AWS services including EC2, S3 (with versioning and Glacier), IAM, ELB, RDS, and EBS.
  - Automated CI/CD pipelines, monitored EC2 and application health using CloudWatch, and supported WAR/EAR deployments on Tomcat.

- **SourceOne Technologies (Deloitte)**
  Technical Support Analyst | Hyderabad, India | Dec 2020 - Sept 2021
  - Troubleshot and resolved production issues in Linux environments, ensuring high availability and performance of applications.
  - Implemented IAM roles and security policies in AWS to enforce least-privilege access and compliance standards.
  - Configured and maintained Jenkins pipelines, Docker containers, and Apache/Tomcat servers for reliable continuous delivery.

- **IBM India Pvt. Ltd**
  Technical Support Analyst | Hyderabad, India | May 2019 – Aug 2020
  - Monitored server and application performance; managed RedHat Linux installation, configuration, and remote SSH administration.
  - Handled user/group management, password administration, and software installations.
  - Conducted server troubleshooting, root-cause analysis, and file system monitoring with resizing as needed.

- **Amazon India Pvt. Ltd**.
  ML Data Associate | Hyderabad, India | Aug 2018 - May 2019
  - Performed data validation for the devices like Alexa and Echo dot.

EDUCATION:

Wright State University, Ohio, USA. Jan 2024 – May 2026
Master's in Computer Science (MSCS)

Andhra University, Andhra Pradesh, India.
Bachelor's of Computer Science (B.Sc.) June 2015 – June 2018

PROJECTS:

- **Veeva Vault – Data Migration**
  AWS EC2, AWS ECS, Lambda, Python, Airflow, Terraform, PGAdmin
  - Worked on data flow orchestration using the AWS services and Terraform.
  - Designed and implemented data pipelines using AWS Managed Workflows for Apache Airflow (MWAA), enabling fully automated, scalable task orchestration.
  - Monitored the DB activities on AWS using the DynamoDB and Amazon RDS, to check if the data is updated upon migration.
  - Used AWS Lambda for invoking the S3 instances for cost optimisation.

- **The Hartford Insurance**
  ServiceNow, Jenkins, Linux
  - Participate in root-cause analysis of recurring issues.
  - Responsible for server troubleshooting.
  - Creating User, Group home directories and password administering.
  - Installing new software packages and other when required by the developer or business.
  - Checking the file systems and increase/decrease the file system if required.

TECHNICAL SKILLS:

Cloud	AWS (IAM, EC2, S3, Glacier, VPC, Route 53)
Programming and Scripting Languages	C, C++, C#, Shell, Python.
Operating Systems	RHEL, Centos, Ubuntu, Linux
Configuration Management Tools	Ansible, Chef
IaC	Terraform
CI/CD Deployment	Jenkins, GitHub Actions, GitLab CI/CD, Azure DevOps
Incident Management	Jira Service Desk, ServiceNow

CERTIFICATIONS:

- **AWS Certified Developer Architect – Associate**
- **AWS Certified Solutions Architect – Associate**
- **AWS Certified Cloud Practitioner**
