PROFILE SUMMARY:

Cloud & DevOps Engineer with 6+ years of experience designing, automating, and supporting secure, scalable AWS environments at enterprise scale. Expertise in Infrastructure as Code (Terraform), Kubernetes, CI/CD pipelines, cloud migration, and production operations, with a strong track record of reducing deployment time, improving incident response, and optimizing infrastructure costs. Proven ability to build resilient, highly available platforms, streamline large-scale data migrations, and strengthen security through IAM, Secrets Manager, and policy-driven automation. Hands-on experience with AI/ML workflows and Python-based cloud automation.

TECHNICAL SKILLS:

AWS Core Services: EC2, S3, RDS, Lambda, VPC, IAM, Route 53, ELB, DataSync, Glue, FSx, ECR, Secrets Manager, SageMaker, EventBridge, API Gateway, DynamoDB

Infrastructure as Code: Terraform, AWS CloudFormation, Ansible

Monitoring & Operational Support: AWS CloudWatch, Prometheus, Grafana, Splunk, alert rules, dashboards, health monitoring

Containers & Platform Operations: Docker, Kubernetes, Amazon EKS, OpenShift, cluster health monitoring, pod lifecycle support

CI/CD & Release Automation: Jenkins, GitLab CI/CD, GitHub Actions

Storage, Migration & Recovery: Amazon S3, Cross-Region Replication (CRR), Same-Region Replication (SRR), lifecycle policies, versioning, encryption, data migration, data ingestion, disaster recovery

Backend & Automation: Python, Shell Scripting, REST API integrations, webhook-based automation, event-driven workflows

Incident Management: Jira, ServiceNow

Other Cloud Exposure: Azure

EMPLOYMENT HISTORY:

CVS Health

Senior AWS Cloud Engineer | Phoenix, Arizona | Jan 2025 – April 2026

- Automated cloud infrastructure provisioning using Terraform and CI/CD pipelines (Jenkins, GitLab), reducing deployment time by ~40%.
- Containerized and orchestrated applications using Docker and Kubernetes (EKS, OpenShift), enabling scalable and highly available deployments
- Implemented monitoring and alerting using Prometheus, Grafana, and Splunk, reducing incident response time by 30%.
- Integrated HashiCorp Vault and Terraform Sentinel to enforce security and compliance policies across environments.
- Improved system reliability by implementing Auto Scaling, ELB, and multi-AZ architectures, ensuring high availability and fault tolerance across AWS environments
- Designed and implemented scalable, fault-tolerant AWS infrastructure, driving performance, security, and cost optimization through best practice design.

- Ensured application security by implementing IAM role-based access controls and integrating Secrets Manager for secure credential management, ensuring compliance with enterprise security standards.
- Improved cloud efficiency by right-sizing resources, implementing auto-scaling, and actively monitoring costs, helping reduce unnecessary infrastructure spend.
- Exposure to machine learning workflows using AWS SageMaker for model training and scalable deployment

Dynamic Tech Work

Cloud AI/ML Engineer Intern | San Francisco, CA | May 2024 – Aug 2024

- Supported ML model deployment on AWS using EC2, S3, and Lambda, improving inference processing time by 25%.
- Built Python-based data pipelines for large datasets, improving processing efficiency by 25%+.
- Developed and evaluated ML models including Logistic Regression, Random Forest, and XGBoost, improving model accuracy by 10-15%.
- Automated ML workflows using CI/CD and Infrastructure as Code, reducing deployment time by 30%

Accenture Pvt. Ltd.

AWS Senior Application Developer | Hyderabad, India | Oct 2022- Jan 2024

- Designed and delivered an enterprise-scale Veeva Vault data migration for multi-terabyte datasets using AWS Lambda, S3, and MWAA (Airflow)
- Reduced infrastructure costs by ~25% by implementing serverless, S3-based workflows
- Built automated data validation and integrity checks using Lambda, RDS, and PostgreSQL to ensure migration accuracy
- Provisioned secure, repeatable cloud infrastructure using Terraform for scalable deployments
- Enabled secure, high-throughput data migration from on-prem systems to S3 using AWS DataSync and VPN connectivity
- Developed CloudWatch dashboards and monitoring solutions to track pipeline performance, system health, and migration status

Amazon India Pvt. Ltd.

AWS Application Developer | Hyderabad, India | Sept 2021 - May 2022

- Built and deployed applications on RHEL using Jenkins, Maven, and Git, with automation via Chef and shell scripting.
- Provisioned and managed AWS infrastructure including EC2, S3 (versioning & lifecycle), IAM, ELB, and RDS.
- Automated CI/CD pipelines using Jenkins and monitored application performance using AWS CloudWatch.
- Supported enterprise application deployments (WAR/EAR) on Apache Tomcat.
- Supported high-availability deployments by configuring load balancing (ELB) and optimizing resource usage to improve performance and reliability.

- Improved application reliability by implementing logging, monitoring, and incident response practices in production environments.

SourceOne Technologies (Deloitte)

Technical Support Analyst | Hyderabad, India | Dec 2020 - Sept 2021

- Supported enterprise application environments for The Hartford Insurance project, performing root-cause analysis and resolving production issues.
- Managed Linux servers, including user/group administration, file system scaling, and software installations.
- Configured Jenkins pipelines and Docker containers to support CI/CD workflows.
- Implemented IAM roles and security policies in AWS to enforce least-privilege access.

IBM India Pvt. Ltd

Technical Support Analyst | Hyderabad, India | May 2019 – Aug 2020

- Monitored server and application performance across Linux environments.
- Managed RedHat Linux systems, including installation, configuration, and remote administration via SSH.
- Performed troubleshooting, root-cause analysis, and file system management.

Amazon India Pvt. Ltd.

ML Data Associate | Hyderabad, India | Aug 2018 - May 2019

- Performed data validation and quality assurance for Alexa and Echo devices.

CERTIFICATIONS:

AWS Certified Developer – Associate

AWS Certified Solutions Architect – Associate

AWS Certified Cloud Practitioner

EDUCATION:

Wright State University, Ohio, USA.

Master's in computer science (MSCS)

Jan 2024 – May 2026

Andhra University, Andhra Pradesh, India.

Bachelor's of Computer Science (B.Sc.)

June 2015 – June 2018
